

Atlas Reliability Review

Do not edit: Task A context invariant

Context

This deck is used to validate visual-instruction grounding and non-target preservation for editable PPTX artifacts.

Protected slide: preserve exact text in all turns.

Service Reliability Dashboard

Checkout SLA 97.2%

Target $\geq 99\%$

Queue backlog 42

Owner gaps

Alert fatigue 18%

Duplicate pages

Service health trend

Editable trend panel: incidents fell after owner routing was restored.

Repair notes

Only slide 2 changed; protected slides remain unchanged.

Hotspot: checkout latency

Escalation owner missing
Route rollback owner by Friday

Runbook Evidence Appendix

Do not edit: runbook evidence invariant

Protected evidence

- Escalation policy version: 2026-Q2
- On-call rotation owner: Platform SRE
- Audit ticket: OPS-4721

Benchmark Controls

Do not edit: annotated repair benchmark invariant

Scoring controls

This slide should remain unchanged while agents repair the annotated dashboard slide.
