

Atlas Reliability Review

Do not edit: Task A context invariant

Context

This deck is used to validate visual-instruction grounding and non-target preservation for editable PPTX artifacts.

Protected slide: preserve exact text in all turns.

Service Reliability Dashboard

Checkout SLA 97.2%
Target $\geq 99\%$

Queue backlog 42
Owner gaps

Hotspot: checkout latency
Needs lower-right callout

Service health trend
Too small and off-grid

A line graph with a green line showing a fluctuating trend. It starts at a low point, rises to a peak, dips slightly, rises to a higher peak, and then ends with a downward slope. The line is contained within a light blue rounded rectangle.

Alert fatigue 18%
Duplicate pages

Annotated screenshot says: top-row metrics, big trend panel, risk callout lower-right.

Runbook Evidence Appendix

Do not edit: runbook evidence invariant

Protected evidence

- Escalation policy version: 2026-Q2
- On-call rotation owner: Platform SRE
- Audit ticket: OPS-4721

Benchmark Controls

Do not edit: annotated repair benchmark invariant

Scoring controls

This slide should remain unchanged while agents repair the annotated dashboard slide.
